3 Erasmus days 2020.....	4
4 The RoboPisces project at FLI2020 conference	4

Editorial

Dear reader,

this troubled year is nearly over. In the beginning, many things have changed in a flash, but in the end, we have something to value. We learned to acknowledge the value of education. We realized that we cannot imagine our future without preparing children for their future lives. We learned that the environment has an influence on our daily life, and we sensed the huge impact that our habits have on the planet. We learned that experiences are what we crave, not things. All the most expensive stuff in the world mean nothing if we cannot share a word with friends and families.

Taking stock of the situation, the RoboPisces partners feel very grateful for the lesson learned and with all our heart we want to wish you a very Merry Christmas and happy new year!

Stay tuned and follow our newsletters, social network accounts and web site (www.robopisces.eu), to be informed about future developments.

The RoboPisces team

1 The RoboPisces project at the ICICTE conference

International Conference on Information Communication Technologies in Education

ICICTE 2020

You can access the RoboPisces poster here:

<https://tinyurl.com/y9vjhlnx>

2-3 July,
On and from Samos, Greece

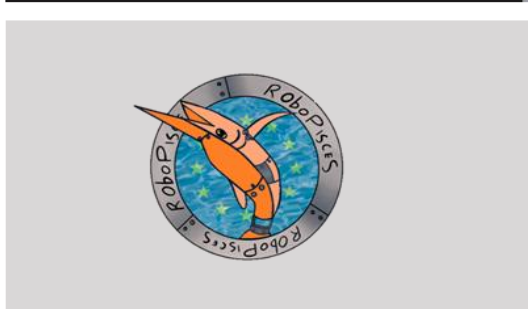

The kit

The output

- INTRODUCE AND EVALUATE FISH KIT.
- CREATE CURRICULUM.
- CREATE TEACHER TRAINING MANUAL.

2 Transnational project meeting

The RoboPisces second Transnational Meeting was held virtually on the 29th and 30th October 2020. Lot to discuss and decide, but partners never lose their smile!

3 Erasmus days 2020

#ErasmusDays2020 was a three days celebration (15-17 October 2020) with 5 024 events held all around the world to celebrate locally the benefits of Europe, communicating the European values, mobility's benefits and Erasmus+ projects results at a large scale. Teachers and students from IC Solari and OS TB realized videos that was shared with participants in the event.

4 The RoboPisces project at FLI2020 conference

2019-1-IT02-KA201-063073
Strategic Partnerships for school education
Cooperation for innovation and the exchange of good practices

The RoboPisces project

Co-funded by the Erasmus+ Programme of the European Union

Teachers' training at the time of COVID-19
41 participants (24 originally planned)

Pedagogical tips and tricks	Robot brain: action-reaction
Robot Design Jobs	Senses and Sensors
Robotics Disciplines	Muscles and Actuators
HW & SW tools for Robot Design	My first robot
My first machine	Listening and communicating
	My first p2p communication

Each topic:
• 1 questionnaire
• 1 knowledge test

1 final questionnaire

Parla: Laura Screpanti

Partecipanti: (19)

The RoboPisces Partners shared latest developments and results at the FabLearn Italy 2020 conference that was held online from the 14° to th 18° December 2020.
